

A/D FIREBARRIER PUTTY PADS

FIRE RATED PADS FOR ELECTRICAL BOXES

7" x 7" x 1/8"

Used to maintain the hourly ratings of fire resistive walls and partitions containing electrical boxes

Adheres to the outside of metallic & some non-metallic electrical boxes

Reduces sound transmission

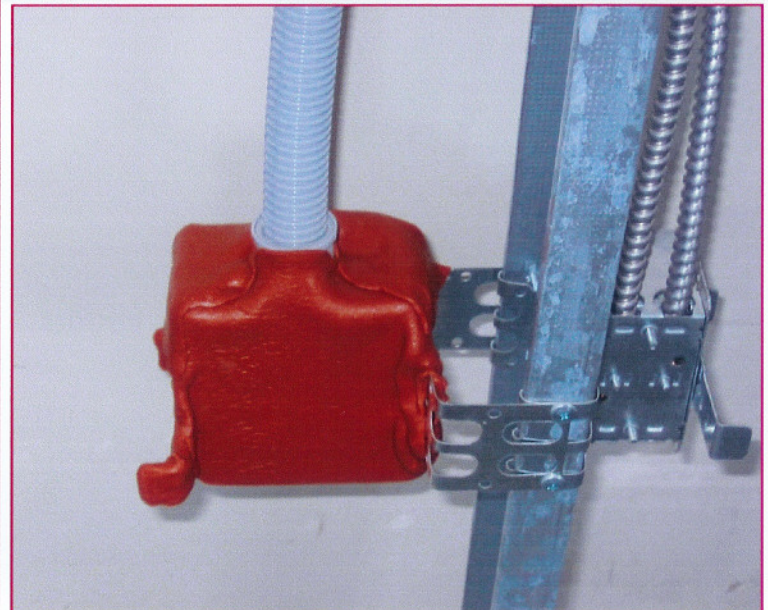

Low conductivity of heat, electricity or sound

Up to 2 HR ratings

UL, ULC, & FM classified.

A/D FIREBARRIER Putty Pads permit the horizontal spacing between metallic electrical boxes on opposite sides of the wall to be less than 24", (provided the boxes are not installed back to back)

A/D FIREBARRIER Putty Pads, when exposed to fire, will expand to completely close the electrical box and seal the opening.
