

FIREFILM®III – PRIMERS

The following primers have been determined to be acceptable for use with A/D FIREFILM®III based on adhesion and compatibility characteristics under laboratory conditions in accordance with ASTM D3359-90, Method A and/or ASTM D4541-95. A/D Fire Protection Systems accepts no responsibility for repeatability of these characteristics in the field as may be influenced by variations to primer formulation, curing time, primer recoat characteristics, site conditions, surface preparation and other factors beyond our control. Consult primer manufacturer for primer application and recoat instructions and limitations. Use of primers other than listed is not recommended without prior consultation and approval by A/D Fire Protection Systems.
